

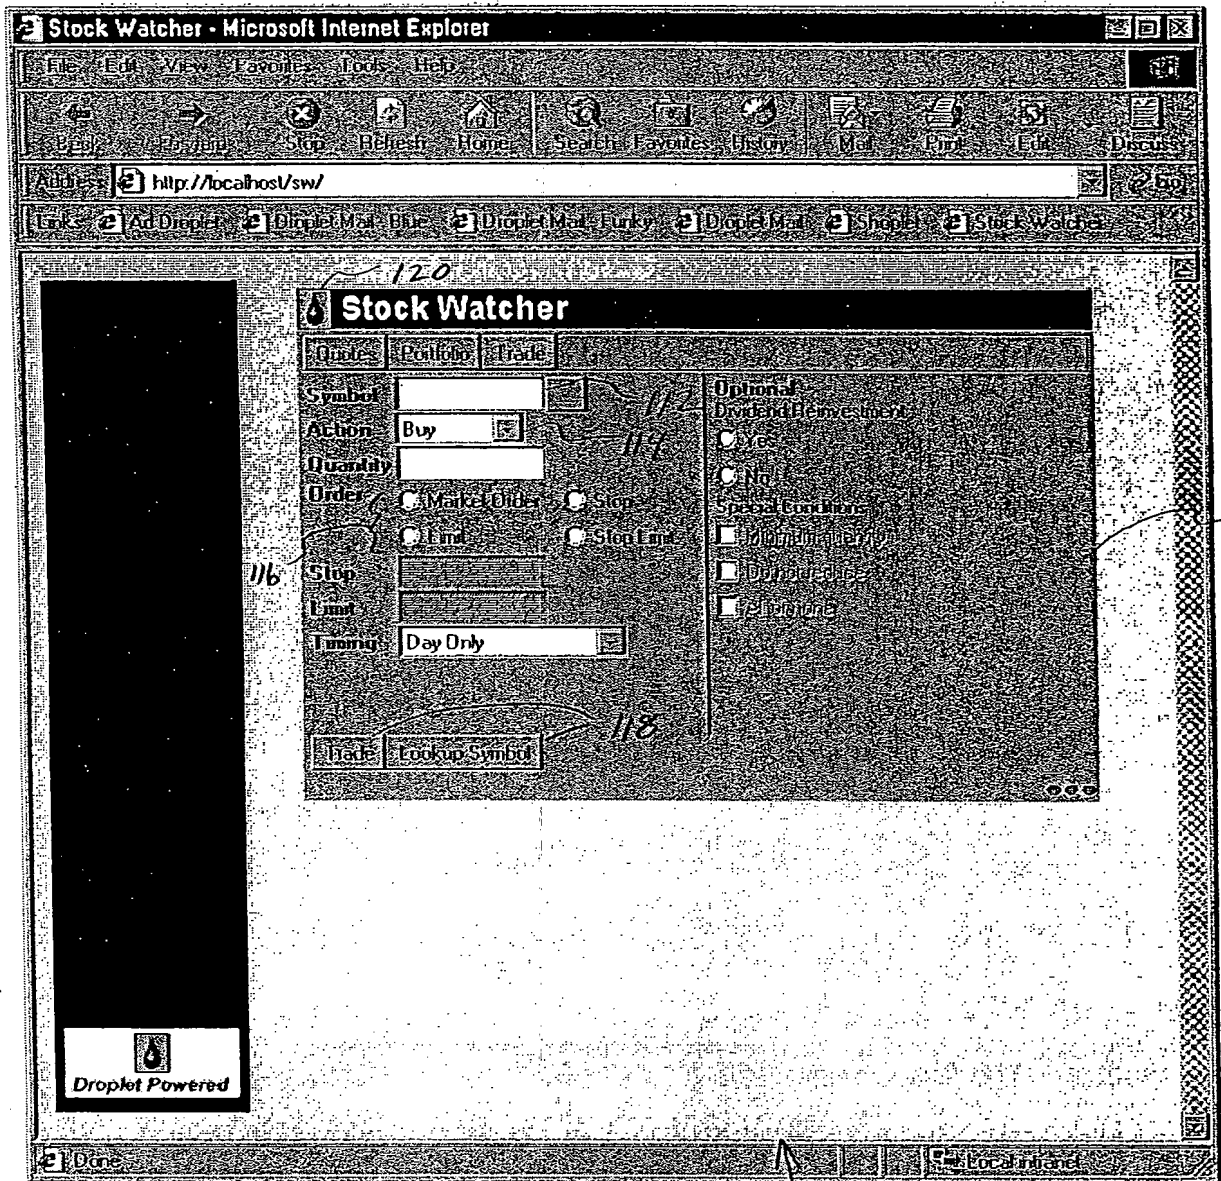

Fig. 1

FIG. 1 is a block diagram of a system architecture. The system includes a Client Computer (20) connected to a Content Provider (30) and an Application Server (40) via a network (50). The Client Computer (20) contains an OS (74) and a Presentation Client (60). The Presentation Client (60) includes LINK1 (70), LINK2 (72), LINK3 (76), and LINK4 (78). The Content Provider (30) contains Applications (32) and Information (34), each with Links (62) and Display (64). The Application Server (40) contains Applications (41), Rendered Instructions (42), Default Parameters and Data Values (44), Application-Specific Business Logic (46), and Operating State Information (48). A database (48) is connected to the Application Server (40) and contains Operating State (640) and Transactions (642). Arrows 52 and 54 indicate data flow between the Client Computer (20), Content Provider (30), and Application Server (40).
